

S-B

lab furniture + fume cupboards

Ecoline 2

The high safety low energy fume cupboard

Creating Safe and Environmentally Friendly Working Environments

Ecoline 2 is a range of walk-in and drive-in fume cupboards for special applications including housing distillation columns and tall free standing test rigs.

Development

Research, development and testing has proven that the highest **Containment** standards for operator protection and the most efficient **Containment Factors** can be achieved by significant reductions in the amount of heated and conditioned air consumed, when compared to traditional fume cupboard designs.

We have been manufacturing and installing fume cupboards and laboratory furniture for over 40 years. Our Manchester offices, showrooms and production plant are always open to visitors. Demonstrations can be arranged and third party reference and site visits can be organised.

Control and alarm panel for fan fail and sash high warning

Bespoke worktop, sink and servicing arrangements

Purpose built pull out trolleys, high level and low level removable worktops

Features and Benefits

- A tough, durable fume cupboard which will withstand heavy and aggressive extended usage, through the use of resistant materials and robust construction.
- Ergonomic side stile and spoiler design
- Solid wall construction
- Up to 22% more internal working space*
- Speedy low cost installation
- Safer and minimal low cost maintenance
- Ecoline has unique internal geometry, side stiles with purge and entrainment slots, front upper baffle and air high/low alarm system. These features combine to give this range of fume cupboards the most efficient operator safety, environmental and running cost balance.

*22% for 1.2 units, 18% for 1.5 units and 13% for 2m units in comparison with traditional units

Sizes

Standard module sizes are 1m, 1.2m, 1.5m, 1.8m and 2m wide. Note that the Ecoline unique side stile design can provide up to 22% more internal working space than traditional fume cupboard designs and the S+B technical services team are always willing and able to develop client specific, bespoke sizes, worktops and servicing arrangements.

Supplied in standard and bespoke widths, with or without low level doors

Clients

We work extensively with architects, project managers, M&E consultants, energy consultants, safety advisors, quantity surveyors, main contractors, mechanical contractors and of course end users.
