

Mural

Enhancing inspirational environments

We believe that well conceived and inspirational educational environments help realise a sense of well-being that supports learning and achievement.

Our extensive experience of delivering projects for the educational sector includes schools, academies, colleges, higher educational institutions and universities.

Our range of wall murals along with our bespoke interiors create environments that stimulate the learning experience.

The images come in standard sizes but can be adapted to fit any specified area you might have.

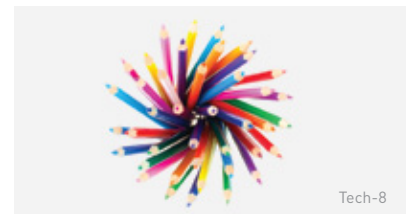

A great photograph is worth a thousand words, if these images grab your attention you'll find a full catalogue of photographic images on our website.

The murals are chosen to support the following areas, Design Tech, Food Tech and Science.

We offer S+B murals as an additional service to furniture supply and install contracts – and not as a stand alone offering but of course we'd always be pleased to talk over any enquiries you might have regarding our complete range of products.

Design Tech murals

Covering design, manufacture and materials (wood, metal, plastic).

S+B high resolution educational murals are designed to easily convert wall areas into motivational spaces. More images on website.

Food Tech mural

Food Tech murals

Covering nutrition, food science, food preparation and food production

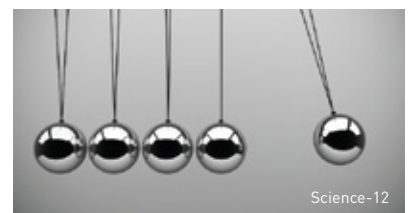

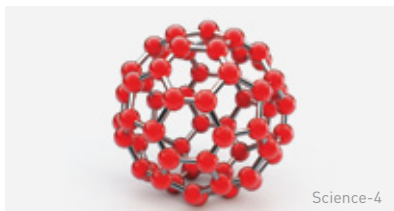

For the complete range of inspirational images please visit our website.

Science mural

Science murals

Covering Biology,
Chemistry and Physics

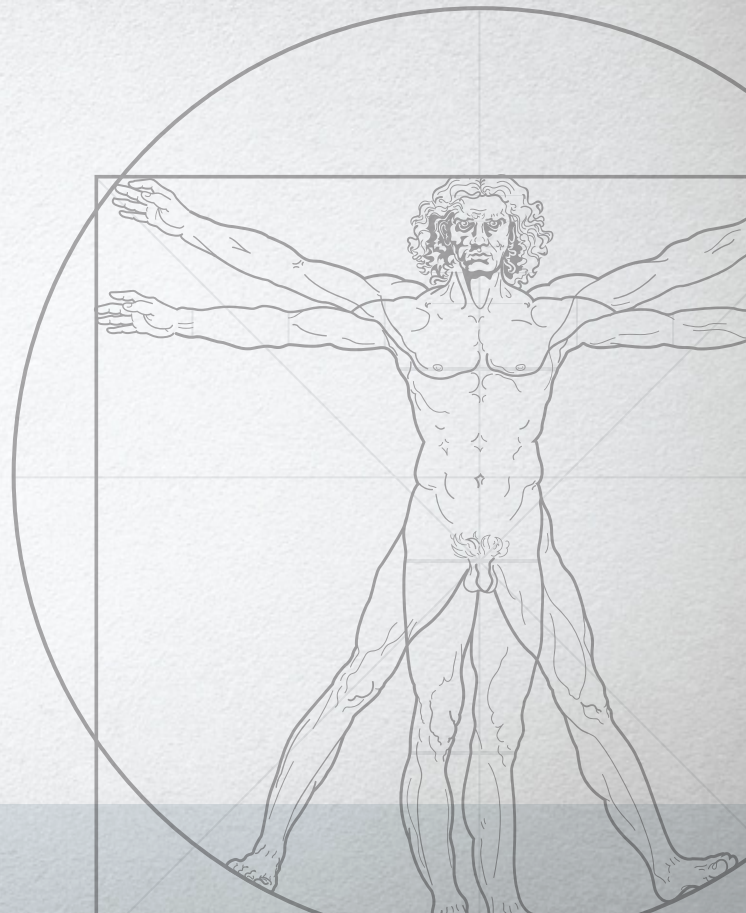

Creating a modern teaching environment to inspire and encourage knowledge assimilation. More images on website.

Inspirational images to help visual thinking and learning in education

These images help and inspire students of all ages to better manage learning objectives and achieve academic success.

As students are required to evaluate and interpret information from a variety of sources, incorporate new knowledge with what they already have learned and think critically, visual learning tools help students meet those demands.

Paired with the brain's capacity for images, visual learning strategies help students better understand and retain information.

Creating dynamic learning experiences

S+B UK Limited is one of the UK leading specialists in the design, manufacture and installation of educational furniture systems

We have over 40 years experience of converting old fashioned, uninspiring classrooms into smart, modern and highly functional contemporary learning environments

Working for schools, colleges and universities, our professional approach and commitment to quality ensures your project will be completed on time, within budget and with minimum disruption.

We can supply everything from a single student desk to a complete state of the art science, food or technology department.

The S+B standard product range includes free standing loose furniture, working walls, fume cupboards and fully serviced fitted furniture for:

- Science
- Design, control and information technology.
- Food technology
- Language laboratories
- Cross curricula general classroom furniture for all subjects including art and music.
- S+B offers a free of charge consultancy and design and our turnkey package.

A Turnkey Package

At S+B we work with you to provide the ideas, solution and final outcome completely free of charge and obligation. From initial consultation of designs, including CAD and 3D drawings, allowing you to view the solution before manufacture.

S+B provide the answer - stripping out and removal of old furniture, reinstatement of mechanical and electrical services – supplying and fitment of new flooring, suspended ceilings, lighting, interactive whiteboards, decoration and installation of new furniture.

From a single space to a complete refurbishment, we create design that works.

S+B Full Product Range

Furniture For Learning

The experience gained over 40 years servicing all market sectors has given S+B a project management capability which is second to none. S+B specialise in design led development, manufacture and installation of schools furniture systems for Science, Design, Control, Information and Food Technology as well as cross curricula general classroom furniture.

Fume Cupboards & Lab Furniture

S+B have over 40 years experience in the design, manufacture and installation of high specification modular and bespoke fume cupboards and lab furniture for Pharmaceutical R&D, Healthcare, Higher Education, Food & Beverages, Utilities and industry.
