

# SEN

# Specialist Furniture for Communication Interaction & Education

“Inclusion is about much more than the type of school that children attend: it is about the quality of their experience; how they are helped to learn, achieve and participate fully in the life of the school” SEN Strategy

Design Technology, Resistant Materials

## Quality Counts

“The most important factor in determining the best outcomes for pupils with learning difficulties and disabilities is not the type but the quality of the provision.” OFSTED, 2006

“Alongside effective management and the school ethos, the learning environment can help prevent some special educational needs arising, and minimise others.” SEN Code of Practice, 2001

Special Educational Needs are very wide ranging and there will be a requirement in some classrooms for adjustable height workstations, some will require individual study booths with sound attenuation and others may require heavy duty furniture and fitments.

We work closely with our clients to provide bespoke solutions for all their needs.

General Science

## Seeking to Stimulate

An overriding principal in every special needs interior design is that students and teachers must be provided with a compelling, stimulating, safe, secure, durable and flexible learning environment.

Some rooms will be subject specific and areas like science, design, control, information and food technology will have requirements particular to those subjects, whilst others will be multi-use cross curricula.

Food Technology

## Inspiring Learning Environments

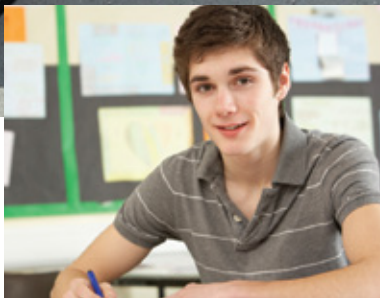

The room designs shown are examples of the sort of contemporary designs developed with all of the above objectives at the core.

S+B provide a full no obligation free consultation and quoting service. We will meet with school representatives to discuss prime objectives, school ethos and particular needs. Once the brief has been taken, S+B can produce a range of costed options with 3D drawings for consideration before a decision is made on design and specification.

Art, Design,  
Planning,  
Evaluation

## Helping students realise and achieve their full potential.

Through innovative teamwork with our clients we aim to create and build stimulating environments that empower staff and carers to impart knowledge, understanding and good practice, in all settings in which the children, young people and adults with sensory impairments are based.

"The culture, practice, management and deployment of resources in a school or setting are designed to ensure all children's needs are met."

SEN Code of Practice, 2001

## A Turnkey Package

**At S+B we work with you to provide the ideas, solution and final outcome completely free of charge and obligation. From initial consultation of designs, including CAD and 3D drawings, allowing you to view the solution before manufacture.**

S+B provide the answer - stripping out and removal of old furniture, reinstatement of mechanical and electrical services – supplying and fitment of new flooring, suspended ceilings, lighting, interactive whiteboards, decoration and installation of new furniture.

From a single space to a complete refurbishment, we create design that works.

## S+B Full Product Range

### **Furniture For Learning**

The experience gained over 40 years servicing all market sectors has given S+B a project management capability which is second to none. S+B specialise in design led development, manufacture and installation of school furniture systems for Science, Design, Control, Information and Food Technology as well as cross curricula general classroom furniture.

### **Fume Cupboards & Lab Furniture**

S+B have over 40 years experience in the design, manufacture and installation of high specification modular and bespoke fume cupboards and lab furniture for Pharmaceutical R&D, Healthcare, Higher Education, Food & Beverages, Utilities and Industry.
